

Week 1

Week of 12/25/2017 – 12/31/2017

During this week we have researched about all the approaches we will take towards our project such as how to work with the Google Maps API. Which MVC Framework to use and how to use it. This week was also the start of the database entry for the homicide information.

After learning about how to work with Google Maps API work has been started on how to make areas be selected.
